

Why should I get an Implanon?

Implanon is sometimes referred to as 'the bar' or 'the implant'

Implanons are 99% effective at preventing pregnancy.

Implanon is a 4 cm long, soft plastic bar.

Implanon is inserted into the skin of your upper arm by a specially trained doctor or nurse.

Implanon is a type of Long Acting Reversible Contraception (LARC) and is extremely effective at preventing unplanned pregnancy.

How can I get an Implanon?

Step 1

Talk to a Family Planning Tasmania doctor or nurse or your regular GP and get a script

Step 2

Get your Implanon inserted

Step 3

Relax knowing that Implanon can prevent unwanted pregnancy for up to three years
